DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see p.15, filed 05/22/09, with respect to 101 rejection of claims 1-18 and 55-60 have been fully considered and are persuasive. The rejection of the claims has been withdrawn.

Specification

2. The disclosure is objected to because of the following informalities: on page 1 of the specification, the application number should be updated. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 37-54 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 37 recites "a correlator" and "an estimator" while the claim also comprises means for generating a data sequence and means for generating a chip sequence. Therefore, it appears that the claim is invoking 112, 6th paragraph wherein the elements are written in means plus function form. However, "a correlator" and "an estimator" are not written in such form, thus is unclear whether the element in the

Art Unit: 2611

claim is invoking 112, 6th paragraph or not, wherein claims 38, 48-51 recite "filter" and wherein claims 39-47 and 52-54 depend on claim 37.

Allowable Subject Matter

4. Claims 1-36, and 55-72 are allowed.
